About us

IAN, a local humanitarian non-governmental organization, was born from the womb of the community to work on the empowerment of community in the Lebanon. The organization aims to support the social development of local community; to empower literacy and education; to raise awareness of the community; and to support people in need. The organization has been registered at the national NGO system by the registration number 687 in June 2020.

The board members who signed the regulations to produce the born of IAN association come from different aspects of the community (Education, Health and social workers). The idea of founding the organization was the clear communal awareness gaps and minimal social development in Lebanon. The main focus is the huge needs of social, economic, health, environmental and educational support

Projects for 2021

University Scholarships for high school graduates

In coordination with the City University in Tyre, and to support high school graduates to continue their education during the economic crisis Lebanon is facing, IAN for development is willing to provide 20 scholarships of 50% value to 20 new students.

Emergency cash assistance

IAN for development is targeting 60 vulnerable families with cash for emergencies like fire, life saving situation and other emergencies.

Food rations distribution

IAN for development will be distributing 150 food rations to most vulnerable Lebanese families in three municipalities (Tyre, Abbasiye, and Borj el chemali) to support the poor families sustain Ramadan

Corona virus prevention intervention

IAN for development is contributing to the fight of the pandemic spread of coronavirus through supporting five municipalities (Tyre, Abbasiye, Taidebba, Maarake, and Borj el chemali) with 1000 kits to support the emergency unit of corona virus fight.

Capacity Building of students and Youth

IAN for development is targeting graduate students, entrepreneurs, and youth with capacity building program to upraise their capacity and prepare them for future career required qualifications. Trainings will target all youth interested with no discrimination.

Projects of 2020

University Scholarships for high school graduates

In coordination with the American university of technology in Tyre, and to support high school graduates to continue their education during the economic crisis Lebanon is facing, IAN for development has provided 20 scholarships of 50% value to 20 new students and trained 5 students on research methodology and data analysis preparing them to the work field.

Capacity Building of students and CBOs

IAN took the initiative to support local students and CBOS improve their capacity through a self-funded project by providing free courses at the level of Universities and Local CBOs and whoever interested.

Courses were delivered at the premises of the requesting party and included the following:
Microsoft word training – Beginner (2)
Microsoft PowerPoint training – Beginner (2)
Microsoft excel training – Beginner (2)
Microsoft word Training – Advanced (2)
Microsoft Excel training – Advanced (1)
